New York City
Big Apple Bootcamp
| September 7 - 9, 2017 | Vascular Skills Course | 525 E 68th Street, SAIL Lab |
Welcome to the second annual Big Apple Bootcamp! We are very excited to once again be offering this hands-on skills course for senior vascular residents and first year vascular fellows. We are fortunate to have recruited distinguished faculty from both regional and national training programs, who add tremendous value to our course. Thank you to our program sponsors for your generous support and for making this course possible. Finally, thank you to our program participants for engaging in this unique educational experience.

The goal of the course is to provide participants with a foundation for success in their training and beyond. Over the next two days, trainees will participate in open surgical simulation using both cadavers and models, endovascular simulation using multiple different platforms, planning workshops, arterial closure workshops, and hands-on device deployment. We look forward to a stimulating and fast-paced exchange of ideas and surgical technique and hope Big Apple Bootcamp will prove to be a memorable and enjoyable learning experience for all.

Sincerely,

Darren B. Schneider, M.D.
Division Chief

Sharif Ellozy, M.D.
Bootcamp Director
