

New York City Big Apple Bootcamp

Save The Date

September 10-12, 2020

This course will provide participants with the knowledge and technical skills needed to be a successful vascular fellow or senior vascular resident.

- Two-day skills course intended for 1st year vascular fellows and 3rd and 4th year integrated residents
- Topics include: aortic aneurysms, cerebrovascular disease, peripheral arterial disease, venous disease and vascular imaging
- Sessions include open simulation using both cadavers and models, endovascular simulation using multiple different platforms, planning workshops, arterial closure workshops, and hands-on device deployment

Sponsored by Vascular and Endovascular Surgery at Weill Cornell Medicine, NewYork-Presbyterian and SAIL (Skills Acquisition and Innovation Laboratory). For more information, contact Jennifer Parker at jep2035@med.cornell.edu, call (646) 962-3455 or visit surgery.weill.cornell.edu/big-apple-bootcamp-0
